

Diosa

Women's Health Center

With a name that translates to "goddess," Diosa strives to celebrate all aspects of womanhood in its services and design. The luxury women's health clinic's goal is to fulfill all sex-specific health needs of women while cultivating a supportive, confident community within its walls that spreads into the rest of the world.

LOBBY

The common areas work to encourage community between patients as well as between patients and their families who may accompany them.

In celebrating womanhood with accents of bright, feminine colors, these main areas will be welcoming to everyone and create an exciting environment to be in.

CONCEPT BOARD

BACK OF LOBBY

DIOSA WOMEN'S CLINIC

The circulation plan of the clinic implements wayfinding elements as well as efficiency for staff and patients. A priority for the clinic is maintaining patient privacy, which is achieved by providing separate access for office workers and careful design of exam rooms, including furniture placement and acoustical elements.

FINANCIAL CONSULTATION ROOM

Patient exam rooms are designed to be a comfortable environment for patients during their visits. Each exam room either contains its own restroom/changing room or shares one with an adjoining room to preserve patient privacy.

HALLWAY

The corridors of the clinic implement wayfinding elements into the floor pattern to clearly delineate the patient areas by creating a rubber flooring “path” throughout the patient wing of the clinic. Wood-look LVT lines the side of the corridor containing exam rooms, with this flooring continuing on into the rooms.

STAFF
BREAK ROOM

The staff break room serves as both a dining and lounge space for all employees of the clinic. It is equipped with a full kitchen and movable seating options to lend greater versatility.
